this text is an important addition to the ongoing discourse on strategic management particularly strategic human resource management it is a result of research carried out in the agricultural sector in general and on multinational tea firms in particular the author s hands on and conceptual insights gained through nineteen years of experience across african countries make the text a useful tool for company boards of directors and strategic level managers charged with the formulation and implementation of business and human resource strategies in addition it provides justification to hr managers of the need to shift focus from primarily being concerned with routine transactional hr activities to dealing with transformational ones which are contingent on the circumstances of the organization scholars management consultants and management students will also find the contents of this book to be of great interest and benefit it is now sufficiently recognised that management has to be concerned with deliverables rather than abstractions therefore many firms formulate and implement one form of business strategy or the other however strategies cannot be conceived let alone realised without human resource input the question that hr continues to grapple with therefore is how it can demonstrate the

contribution of each employee to the bottom line and business sustainability how this question is to be answered has not always been explained and is even more crucial for the agricultural firms which are characterized by great instability in terms of weather patterns commodity prices currency exchange rates and wage levels hr planning in these circumstances cannot be a simple exercise but getting it right is more important than for organizations in more predictable environments this book moves away from the romanticization of the role of hrm in such organizations and instead provides empirical evidence of the types of business and human resource strategies employed strategic integration between these strategies and the strategic human resource management processes and practices used finally it considers the concomitant synergies achieved by strategic fit between business and human resource strategies and their role in achieving sustainable competitive advantage

where did the era of divided government come from what sustains split partisan control of the

institutions of american national government year after year why can it shift so easily from democratic or republican presidencies coupled with republican or democratic congresses how can the vast array of issues and personalities that have surfaced in american politics over the last forty years fit so neatly within indeed reinforce the sustaining political pattern of our time these big questions constitute the puzzle of modern american politics the old answer a majority and a minority party plus dominant and recessive public issues will not work in the era of divided government byron shafer a political scientist who is regarded as one of the most comprehensive and original thinkers on american politics provides a convincing new answer that has three major elements these elements in combination not divided government as a catch phrase are the real story of politics in our time the first element is comprised of two great sets of public preferences that manifest themselves at the ballot box as two majorities the old cluster of economic and welfare issues has not so much been displaced as simply joined by a second cluster of cultural and national concerns the second element can be seen in the behavior of political parties and party activists whose own preferences don t match those of the general public that public remains reliably left of the active republican party on economic and welfare issues and reliably right of the active democratic party on cultural and national concerns the third crucial element is found in an institutional arrangement the distinctively american matrix of governmental institutions which converts those first two elements into a framework for policymaking year in and year out in the first half of the book shafer examines how dominant features of the reagan first bush clinton and second bush administrations reflect the interplay of these three elements recent policy conflicts and institutional combatants in shafer s analysis illuminate this new pattern of american politics in the second half he ranges across time and nations to put these modern elements and their composite pattern into a much larger historical and institutional framework in this light modern american politics appears not so much as new and different but as a distinctive recombination of familiar elements of a political style a political process and a political conflict that has been running for a much much longer time
