mcqs for medical students and doctors is an unusual multiple choice question book on three accounts it covers thirteen

of the specialties in medicine that every medical student has to face and every first contact physician has to deal with in encounters with their patients irrespective of the doctor's field of specialization unlike many mcq books this book goes further by providing comments that accompany 99 of the answers as explanations or additional information this makes this book an mcq book with short notes it is different from most if not all mcq books in medicine for the others are usually specialty specific this mcq book successfully covers fundamental topics in three selected pre clinical subjects viz anatomy pharmacology and therapeutics and parasitology as well as ten clinical specialties viz obstetrics and gynecology dermatology anesthesia mental health ophthalmology otorhinolaryngology general surgery orthopedics trauma internal medicine and general pediatrics detailed material is provided in book reviews and how to use for the reader's guidance

review provides a succinct updated review of common issues facing the primary care physician great tool for the family practice physician preparing for certification or recertification as well as those preparing to take the spex a panel of specialists in various clinical disciplines has been added to provide in depth knowledge of relevant clinical conditions with a holistic family practice approach

offers real mcq practice examinations at the appropriate level for preparing for your final medical examinations this book features four practice papers each containing 60 questions in best of five and multiple choice format this allows you to test your knowledge and prepare for the examination

about 550 registrants from 51 different countries attended the seventh ottawa conference on medical education and assessment in maastricht we received 525 abstracts for the conference divided in thematic poster sessions and platform presentations organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous ottawa conferences during and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression despite the large number of papers the editors have attempted to review and edit the papers as carefully as possible occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers although we felt that our editorial task was not quite finished we nevertheless decided to include these papers we thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and

requests we are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education the editors want to thank jocelyn flipppo berger whose expertise with desk top publishing and perseverance was a great help

this book examines the challenges of cross professional comparisons and proposes new forms of performance assessment to be used in professions education it addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of performance assessment for learning to the next level in order to be better equipped to cope with increasing complexity change and diversity in professional education and performance assessment administrators and educators will engage in crucial systems thinking the main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels to answer this question the book identifies unresolved issues and clarifies conceptual elements for performance assessment it reviews the development of constructs that cross disciplines and professions such as critical thinking clinical reasoning and problem solving it discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes finally the book examines what it takes for administrators and educators to develop competence in assessment such as reliably judging student work in relation to criteria from multiple sources the co editors of this volume marcia mentkowski and paul f wimmers are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process lee shulman stanford university
